Junior Software Developer

I worked at ABT Telecoms as a Junior Software Developer, also a Data analyst and a Network Engineer. I worked on an insurance company CRM project that enhances the effective communication and cut costs between clients and the organization. The system was created using frameworks like Composer, PHP, Laravel, Nodejs, Vue.js, and programming languages like HTML, CSS, JavaScript, JQUERY, and the database we used was MYSQL.

I was also using Microsoft PowerBI for data analysis which also include DAX. I am also exposed to networking as the company supplies internet connectivity to places that do not have it. Therefore we created another system that will be used to monitor sites remotely from different places across the country.

PROJECTS

Motion Sensor Security System

I was part of the development team that created a security system that can be used by organizations and households to secure their premises using MongoDB, Reactjs, JAVASCRIPT, Python, Nodejs, JQUERY

OTHER SKILLS

- RESTful APIs
- Microsoft PowerBI
- Cybersecurity
